This book explores how psychoanalysis and architecture can enhance and increase the chances of mental 'containment', while also fostering exchange between inside and outside.² Psychoanalysis and Identity in Architecture work of signifiers in the metonymic chain corresponds to a network of signifiers in the concept, and thus accomplishes signification. Psychoanalysis, from its earliest days, has been interested not only in patients and the neuroses that they construct but also in other human creations—dreams, jokes, works of literature and art, social institutions, and anything that can be understood and appreciated more fully by recognizing its origins in man's inner mental life.
